PROFILE

I am passionate about building reliable and scalable software solutions that solve real-world problems. With a strong foundation in software development principles and experience in several programming languages, I can work effectively in a team environment and contribute to projects in a meaningful way. I am eager to continue learning and expanding my skill set as I grow in my career as a software developer.

EMPLOYMENT HISTORY

Jan 2024 — Present

Software Developer, Jumbo Star Solutions Limited

Nakuru

I am actively acquiring and mastering SvelteKit, showcasing proficiency in building efficient and modern web applications. I play a key role in adopting SvelteKit for our projects, contributing to the team's technical growth and enhancing our development capabilities. My responsibilities include :

- Designing and implementing user interfaces.
- Ensuring seamless interactions, and a positive user experience.
- Through hands-on experience and continuous learning.

I am adept at leveraging the features of SvelteKit to create performant and scalable web applications.

Aug 2022 — Jan 2023

Junior Software Developer, BridgeOutlook

Nairobi

As a Junior Software Developer, I was responsible for developing, testing, and maintaining the company's ERP software solutions, ensuring their reliability and scalability. Key responsibilities included:

- Collaborated with the development team to design, develop, and maintain our company's ERP software solutions using PHP.
- Wrote clean, efficient, and well-documented code that adheres to coding standards and best practices.
- Participated in code reviews and testing to ensure the software is of high quality. Troubleshoot and debug software issues, identified and implemented solutions in a timely manner.
- Continuous improvement of the ERP software and ensured it remained within industry standards.

May 2022 — Aug 2022

IT Intern, Sun Africa Hotel

Nairobi

As an IT Intern, I got to work alongside experienced IT professionals and gained hands-on experience in supporting the hotel's IT infrastructure and systems. My main responsibilities were:

- Assisted in the installation, configuration, and maintenance of hardware and software systems.
- Provided technical support to end-users, troubleshooting issues and escalating as needed. Helped manage IT inventory and ensure all equipment was properly maintained and accounted for.
- Assisted with monitoring and maintaining IT security protocols, including firewalls and antivirus software.
- Participated in the planning and implementation of new IT projects.
